The J4NG program is embedded in 51 high schools throughout Nevada, delivering a highly effective graduation and work readiness model that yields the highest results

By supporting youth to reach graduation and connect with a meaningful career pathway, we can impact the future of our state.

As a junior at Eldorado High School, Ray'Shaun had a need for guidance and practical skills. His counselor encouraged him to take the J4NG class which gave him the employability skills and direction he required to find success. Ray'Shaun was in J4NG's first graduating class (2015) and is proudly the first alumni to come back and serve as a J4NG Specialist, mentoring future generations of young adults at Sierra Vista High School.

Sierra Vista Class of 2021 graduate Jadon V. joined the J4NG program to find his path forward. Through this program he gained employability skills and took advantage of the opportunity to train and earn his drone pilot's license from the FAA. In early August, Jadon started his career with Tesla in Northern Nevada, working in their Gigafactory full time while pursuing his Advanced Manufacturing credentials at Truckee Meadows Community College. With his drive and the guidance of his J4NG mentor, Jadon has a bright future ahead!
