

Every student has a story...

JAG Nevada makes sure every student's story includes a diploma and a career path to a brighter future.

Bridging the Gap

Nevada ranks 50th in the nation in school quality, leaving youth in danger of dropping out of school and limited job opportunities. JAG Nevada is there to help vulnerable students realize their potential and create a plan that leads the way to graduation, college and career pathways.

This is executed through JAG Nevada's Core Model, a seven-step, multi-year process which is implemented as follows:

1 Faculty and teachers identify students who may be struggling. They facilitate a meeting between specialists and these students.

2 Specialists meet with students to explain the program and encourage them to commit to trying it out.

3 Students are enrolled in an on-campus elective course during class time, which instructs them in 87 life and career competencies—and provides each student with careful mentoring.

4 Specialists, faculty, and students work together to explore careers, internships, job readiness training, career technical education, and national career associations.

5 Students progress toward graduation.

6 Specialists continue to mentor students through regular meetings and communication for 12 months after graduation, providing guidance, encouragement, and suggestions for career development.

7 Eventually, many JAG Nevada alumni return to the school system to “pay it forward” by providing mentorship to the next generation of students.

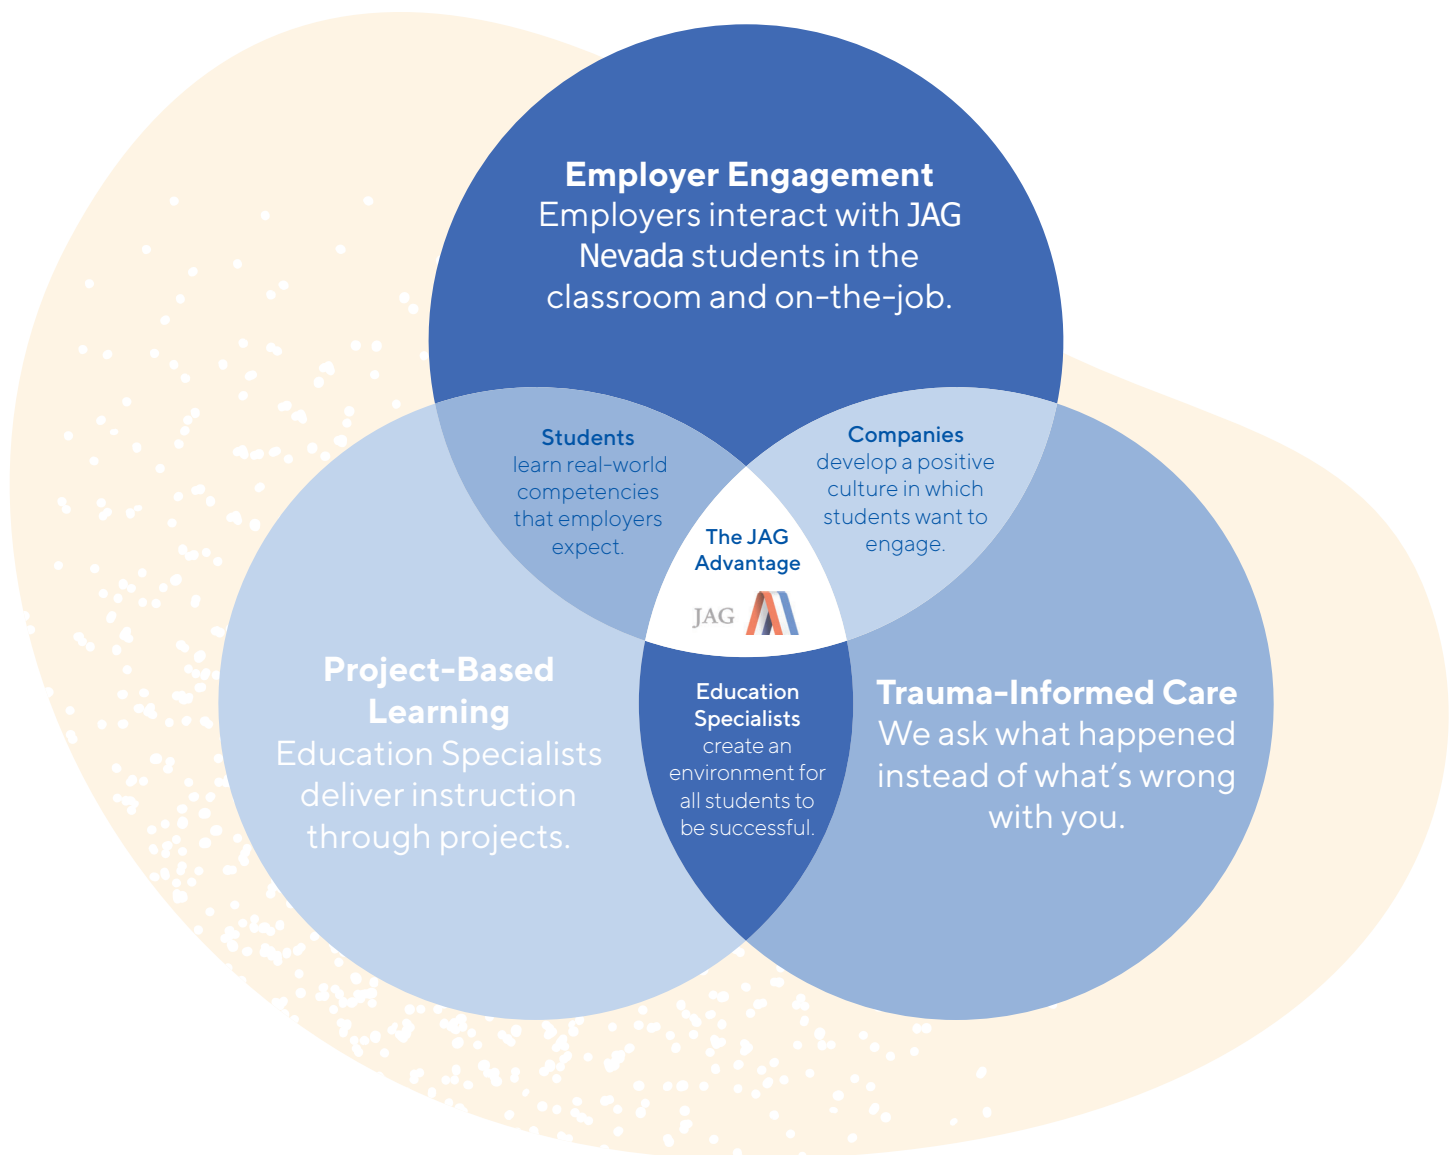

How does JAG Nevada inspire, support & mentor students to create powerful and positive futures? Through the JAG Advantage!

The **JAG Advantage** is foundational to building successful work and life ready young adults. By delivering effective interventions with staff who are trained in **Trauma-Informed Practices**, adept

The JAG Advantage develops **students' talents and skills** to successfully transition to **career and adulthood**.

The JAG Advantage

Our Impact on Nevada Youth

JAG Nevada practices transparency and prioritizes an excellent engagement methodology for our students by keeping a powerful data architecture in place. This helps us to understand how our programs are performing, make adjustments where needed, and easily furnish information about our organization to legislators, business partners and the broader community.

1:1

1:1 Relationships. JAG Nevada takes a deeper approach to relationships, building one-on-one, face-to-face rapport between students and mentors that provide them with accountability, mentorship and support as they work to graduate from high school and start their careers.

23,000+

Over 23,000 Students of Promise Served. JAG Nevada has provided mentorship, guidance and support to thousands of students in our state—helping them to transform the circumstances of their lives and start on the path to continuous, positive self-development.

Investing Time Wisely

JAG Nevada takes the contact hours we spend with our students very seriously. Each moment shared between our mentors and students is designed to motivate, educate and help students lay the groundwork for their future.

Through our program, students come to understand their interests and aptitude using a variety of assessments which help them to develop clarity about their life's direction. Our mentors then work

with them to develop college and career readiness competencies as well as important life-management skills that will allow them to thrive as responsible, competent adults in the post-graduation world. Here, we take a deep rather than a broad approach to nourishing the strengths of our students, providing them hands-on instruction, emotional and academic support, and offering thoughtful guidance every step of the way.

Our work to support Nevada students doesn't end at graduation. For up to two years following graduation, our specialists keep in touch with students, offering them further advice, compassionate support, and a sense of accountability as Nevada's youth make their first steps into adulthood.

130

130 Contact Hours. Our organization understands that building deep, meaningful relationships takes time. For that reason, every JAG Nevada youth gets at least **130** contact hours a year with their mentors, and oftentimes many more. It's a significant investment with a huge payoff.

360

360 Degree Assessments. Every JAG Nevada student sets goals based on data-driven, evidence-based approaches that ensure better outcomes for students. These goals are sharpened through assessments that help students to understand key competencies and affinities needed to make their dreams come true.

98%

98% Graduation Rate for JAG Nevada Students. Graduation isn't JAG Nevada's only priority, but it remains one of the most important. Our program is successful in re-engaging students in their education, and boasts a remarkably high graduation rate for the youth we work with.

89%

89% average placement rate in full-time employment, college, or military positions in 2025. JAG Nevada programming and mentorship works, and the majority of our students go on to excel at colleges, universities, businesses and military units throughout the state and the nation.

Students Succeeding in Nevada

*How Your Investment in JAG Nevada
Has Helped to Change Lives*

Isabelle - Las Vegas High School Graduate Class of 2017

When her plans to attend university fell through, 2017 JAG Nevada graduate Isabelle applied for the Tesla Manufacturing Development Program at the Sparks Gigafactory. There she enjoyed an excellent starting salary, benefits, and stock options. It also gave Isabelle an intensive, paid apprenticeship. Fast forward to today and Isabelle has been promoted to Lead Production Associate and has completed her Advanced Manufacturing credentials at Truckee Meadows Community College. She oversees the production line, trains newer recruits and helps fix equipment that goes down (her favorite job duty). Through her hard work and determination, Isabelle has achieved success and is a wonderful role model for JAG Nevada apprentices following in her footsteps.

KP - Mojave High School Graduate Class of 2020

"I did a thing," is the message KP sent to his JAG Nevada Specialist. This simple message nearly brought JAG Nevada Specialist, Ms. Gaynes, to tears. KP had withdrawn from college because of financial difficulties. KP moved back to Las Vegas, and for months he and his Specialist worked together to help him find a career path. KP persevered through all the challenges that 2020 had to offer. Now KP is in an apprenticeship program with TAB Contractors Inc. and has a goal of working in construction to move up the ranks. In 2024, we received an update that KP has completed his apprenticeship and is a full fledged journeyman earning a living wage.

Jenny - Reno High School Class of 2022

JAG Nevada is becoming a tradition in Jenny's family. Growing up in Las Vegas, Jenny and her siblings struggled with poverty and lack of stability. When Jenny's older brother joined JAG Nevada at Mojave High School, he was connected to Tesla's Manufacturing Development Program, in which he pursued an apprenticeship with Tesla after graduation. He moved to Reno, taking his younger siblings with him and gaining full custody. The transition was hard for Jenny until she was introduced to the JAG Nevada program at Reno High School. Jenny recounts, "It got better, once a miracle happened." Working with her JAG Nevada Specialist, Jenny graduated and is on her way to a beautiful future as a strong, resilient young woman.

Ray'Shaun - Eldorado High School Class of 2015

As a junior at Eldorado High School, Ray'Shaun had a need for guidance and practical skills. His counselor encouraged him to take the JAG Nevada class which gave him the employability skills and direction he required to find success. Ray'Shaun is proudly the first alumni to come back and serve as a JAG Nevada Specialist, mentoring future generations of young adults.

Get Involved With JAG Nevada

Change the life of a Nevada youth and elevate our community.

We understand that quality education and achievement for Nevada students is a community project. That's why as we endeavor to provide students with the tools they'll need to succeed, we invite community members like you to help us do our important work.
